

PROPULSION INSTRUMENTATION WORKING GROUP (PIWG)

PIWG was formed in 1995 to address critical turbine engine test-instrumentation development and sensor issues and to keep pace with the expected future needs of turbine engine development programs. Additionally, PIWG encourages U.S. commercial sources for advanced instrumentation in the turbine engine industry.

PIWG focuses on:

- Identifying common needs;
- creating a **strategy and vision** to guide future research and development
- Speaking **as a consensus voice** to represent the turbine instrumentation industry; and
- Co-developing **necessary technologies**.

PIWG's proven strategy offers vendors, universities, and government agencies a vehicle to understand turbine industry requirements, set marketing and development strategies, and adjust programs to maximize benefits and produce tangible results.

PIWG MEMBERS

INDUSTRY PARTICIPANTS	GOVERNMENT ADVISORS
General Electric Aviation	Air Force Research Laboratory (AFRL)
Honeywell Aerospace	Arnold Engineering & Development Center (AEDC)
Pratt & Whitney	NASA Glenn Research Center
Rolls-Royce Corporation	National Energy Technology Laboratory (NETL)
Siemens Power Generation, Inc.	Naval Air Warfare Center – Aircraft Division (NAWCAD)
Williams International	Oak Ridge National Lab – (ORNL)

The Ohio Aerospace Institute (OAI) serves as the PIWG facilitator.

STRATEGIC ADVISORY BOARD MEMBERSHIP

- SUCCESS THROUGH COLLABORATION
- STREAMLINED INDUSTRY, GOVERNMENT AGENCY, AND ACADEMIC INSTITUTION INTERACTION
- EFFICIENT, EFFECTIVE TECHNOLOGY DEVELOPMENT

November 2009

Cooperative Development of Propulsion Instrumentation

U.S. turbine engine companies, government agencies, vendors, and academic institutions working in concert.

WHY THE SAB IS IMPORTANT TO PIWG?

The Strategic Advisory Board (SAB) provides relevant vendor and university information which PIWG incorporates into the overall group strategy. This helps to ensure that all members get early access to valuable knowledge necessary to achieve PIWG's short- and long-term goals in turbine engine instrumentation development and applications.

As a PIWG SAB member, you will have the opportunity to take part in selected PIWG activities on a regular basis and stay "plugged in" to the thoughts and concerns of the turbine engine industry.

BECOMING A PIWG STRATEGIC ADVISORY BOARD MEMBER

Any United States of America vendor or university can apply to become an SAB member by filling out the application (on the following page) and faxing it to the Ohio Aerospace Institute (OAI), Attention PIWG Membership at 937-424-3486. Upon receipt, an OAI representative will contact you to discuss membership.

The cost of vendor membership is \$1000 per year. Academia membership is \$300 per year.

For more information on PIWG go to WWW.PIWG.ORG.

BENEFITS OF BECOMING AN SAB MEMBER

PIWG has established itself as the "one-stop shop" to mine the market for current and future advanced turbine engine instrumentation technologies. As an SAB member you gain:

1. **Increased exposure** at PIWG conferences using electronic displays to demonstrate items of interest and new technology developments pertinent to your organization.*
2. **Access to selected business meeting sessions** held in the Spring and Fall.**
3. **Insight into new ideas and connections** through regular internet teleconferences which provides SAB members the opportunity to present areas of interest, recent or planned developments, or new technologies.
4. **An online marketing opportunity** to add your company or department link on WWW.PIWG.ORG.

* *As an SAB member, you will have the opportunity to electronically display a PIWG-approved poster at the Spring and Fall meetings, and on the PIWG website. This PDF-format poster can list items of interest and new technology developments pertinent to your organization.*

** *The Fall Meeting includes a focused strategy session at which SAB members will have an exclusive opportunity to meet with PIWG and its government advisors. Additionally, SAB and PIWG will work collectively to create a vision and roadmap for future turbine engine instrumentation development. Furthermore, there will be reserved table space at the Fall Meetings to display papers and product literature.*

STRATEGIC ADVISORY BOARD MEMBER APPLICATION

- Price:
- Vendor Membership \$1000/per yr.
- Academia Membership \$300/per yr.

Provide Brief Description of Company or Department:

Company Web Address:

Contact Name:

Contact Phone Number:

Contact E-mail Address:
